

PHASE 1 – IDEATION

Brainstorming – Idea Generation – Prioritization

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

1. Purpose

This document follows the supplied Brainstorm & Idea Prioritization template and applies it to the ServiceNow Standard Laptop procurement project.

2. Team / Project Details

Field	Details
Team ID	6ab4c536b5170a9b58b4c6e7
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

3. Define the Problem

The current IT procurement process for Standard Laptop orders involves manual handling, which can cause delays in laptop configuration. Configuration tasks may be overlooked or delayed, increasing user waiting time and creating additional manual work for the IT department.

4. Brainstorming Rules

- Stay on topic
- Defer judgment
- Go for volume
- Encourage ideas
- Listen to others
- Make ideas visible where possible

5. Idea Generation

Participant	Ideas
Person 1	Standard Laptop Service Catalog; Simple request form; Capture required laptop details
Person 2	Approval workflow automation; Approval status visibility; Approval-based fulfilment
Person 3	Automatically create Catalog Task; Automatic task description; Trigger flow after approval
Person 4	Assign task to Hardware group; Centralized task tracking; Automatic task ownership
Person 5	Email notifications; SLA monitoring; Procurement status dashboard
Person 6	Inventory integration; Laptop availability check; Future procurement analytics

6. Idea Listing & Grouping

Idea Group	Ideas
Request Automation	Standard Laptop Service Catalog; Automated request processing; Simple request form
Approval Automation	Approval workflow; Approval status visibility; Approval-based fulfilment
Task Automation	Automatic Catalog Task creation; Automatic task description; Task creation after approval
Team Assignment	Automatic Hardware assignment; Centralized task tracking; Automatic task ownership
Future Enhancements	Email notifications; Inventory integration; SLA monitoring; Procurement dashboard

7. Idea Prioritization

Idea	Importance	Feasibility	Project relevance
Automatic Catalog Task creation	High	High	Directly removes manual task creation
Automatic Hardware assignment	High	High	Directly routes configuration work
Approval-based task creation	High	High	Matches the approved-request process
Email notifications	Medium	Medium	Useful enhancement
Inventory integration	Medium	Low	Requires additional integration/data
Dashboard	Low/Medium	Medium	Future visibility

8. Selected Project Idea

Automate Standard Laptop Orders using ServiceNow Flow Designer.

A ServiceNow Flow Designer automation that uses the Standard Laptop Service Catalog process and, for the approved request process, creates a Catalog Task for laptop configuration and assigns it to the Hardware team.

9. Reason for Selection and Expected Outcome

The selected idea directly addresses the manual hand-off problem and is feasible within the project scope. After an eligible Standard Laptop request reaches the required approval state, the configured Flow should create a Catalog Task with the short description and description “Laptop need to Configured”, set Assignment Group to Hardware, and allow the generated task to be verified from the Requested Item.

10. Link to Next Phase

The selected idea is carried into Requirement Analysis to define the customer journey, user stories, functional and non-functional requirements, data flow and technology stack.
