

# PHASE 1 – IDEATION

## Define Problem Statement

*Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer*

| Field         | Details                                                                           |
|---------------|-----------------------------------------------------------------------------------|
| Team ID       | 6ab4c536b5170a9b58b4c6e7                                                          |
| Project Name  | Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer |
| Maximum Marks | 4 Marks                                                                           |

### 1. Template-aligned Problem Statement

| Problem Statement | I am (Customer)                       | I'm trying to                                | But                                              | Because                                         | Which makes me feel                        |
|-------------------|---------------------------------------|----------------------------------------------|--------------------------------------------------|-------------------------------------------------|--------------------------------------------|
| PS-1              | IT procurement team member            | Process Standard Laptop requests efficiently | Configuration tasks may require manual follow-up | The current process lacks sufficient automation | Concerned about delays and manual workload |
| PS-2              | Employee requesting a Standard Laptop | Receive a configured laptop promptly         | Configuration task may be delayed                | Task creation and assignment are not automatic  | Frustrated by waiting                      |

### 2. Selected Core Problem Statement

The current IT procurement process for Standard Laptop orders involves manual handling, which can cause delays in laptop configuration. Configuration tasks may be overlooked or delayed, increasing user waiting time and creating additional manual work for the IT department.

### 3. User Story from Problem

As a member of the IT procurement team, I want a streamlined process for ordering standard laptops so that tasks are automatically generated and assigned to the Hardware team for configuration. This will ensure that laptops are promptly configured upon arrival, reducing user wait times and minimizing manual intervention.

### 4. Project Objective

- Create a seamless experience for users requesting standard laptops by ensuring timely configuration.
- Reduce manual intervention and potential errors in the procurement process.
- Improve resource utilization within the IT department by optimizing task allocation.
- Enhance overall efficiency and productivity in IT procurement operations.

### 5. Problem Impact

| Area      | Impact                                               |
|-----------|------------------------------------------------------|
| Requester | Longer waiting time and repeated status follow-up if |

|                 |                                                          |
|-----------------|----------------------------------------------------------|
|                 | configuration is delayed.                                |
| IT Procurement  | Additional manual task creation and checking.            |
| Hardware Team   | Risk of delayed or missed configuration task assignment. |
| Overall Process | Inefficient hand-off between approval and fulfilment.    |

## 6. Problem-to-Project Link

The project therefore focuses on automating the transition from an approved Standard Laptop request to a Hardware configuration Catalog Task using ServiceNow Flow Designer.
