

PHASE 1 – IDEATION

Empathy Map Canvas

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

1. Purpose

The empathy map captures the requester's behaviours, attitudes, goals and challenges from the user perspective, following the supplied Naan Mudhalvan template structure.

2. Team / Project Details

Field	Details
Team ID	6ab4c536b5170a9b58b4c6e7
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

3. Empathy Map – Standard Laptop Requester

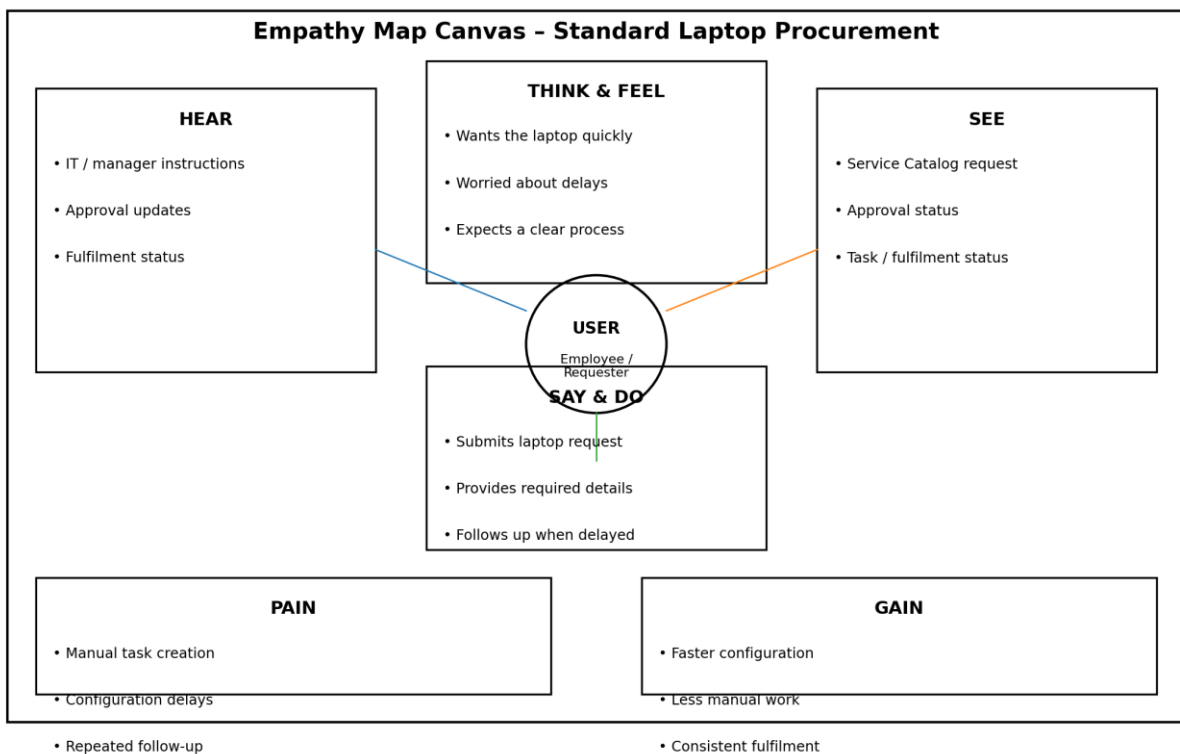

Figure 1: Project-specific Empathy Map Canvas

Area	Project-specific content
Says	I need the laptop request processed quickly; I want to know whether configuration has started.

Thinks	Has my request been approved? Has Hardware received the task?
Does	Places the request, checks status, waits for approval and waits for configuration.
Feels	May feel frustrated by delays; satisfied when the process is predictable and automated.
Pains	Manual task creation, delayed configuration, missed tasks and repeated follow-up.
Needs / Gains	Fast request handling, automatic task creation, correct Hardware assignment, clear fulfilment flow and reduced waiting caused by manual hand-off.

4. Key Insight

The requester primarily needs a predictable transition from request and approval to configuration. This supports the selected automation idea: create and assign the configuration Catalog Task automatically after approval.
