1. Purpose

The customer journey maps the employee/requester experience from identifying the need for a Standard Laptop through request, approval, automated task creation, Hardware assignment and configuration.

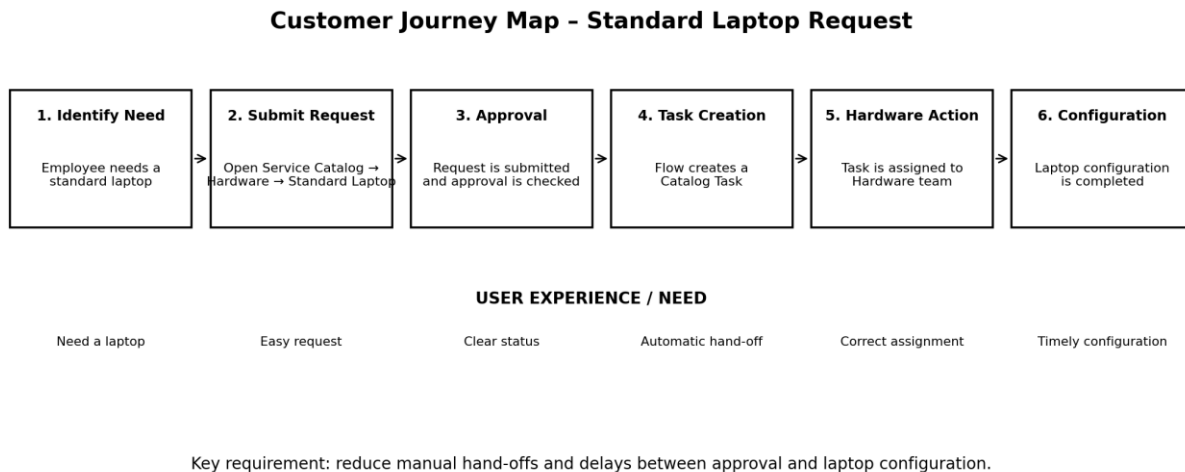

Figure 1: Customer Journey Map

Stage	User Action	System / Team Action	Pain Point	Desired Outcome
Need	Employee needs a laptop	—	Process unclear	Clear catalog option
Request	Select Standard Laptop and order	Service Catalog creates request	Waiting	Request recorded
Approval	Wait for approval	Approver reviews	Approval can delay	Approved request
Automation	Waits	Flow Designer triggers	Manual task creation	Catalog Task generated
Assignment	Waits for configuration	Hardware receives task	Wrong/manual assignment	Correct routing
Fulfillment	Receives laptop	Hardware configures	Configuration delay	Laptop ready

2. Journey Success Criteria

- Standard Laptop is easy to locate under Service Catalog → Hardware.
- Request is recorded and can be tracked by Request Number and Requested Item.
- Approval is visible and can be completed.
- Approved request causes the configured Flow to execute.
- Catalog Task is generated and linked to the Requested Item.
- Hardware receives the generated task for configuration.
