

PHASE 2 – REQUIREMENT ANALYSIS

Technology Stack

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Field	Details
Team ID	6ab4c536b5170a9b58b4c6e7
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

1. Technology Selection

The technology stack follows the actual ServiceNow project implementation and uses native ServiceNow components for request, approval, workflow automation and task fulfilment.

Layer / Component	Technology	Purpose
Platform	ServiceNow	IT service management and workflow platform used for the project.
User Interface	ServiceNow Service Catalog	Provides the Standard Laptop request and ordering interface.
Automation	ServiceNow Flow Designer	Creates and manages the automated workflow.
Trigger	Service Catalog Trigger	Starts the Flow from the catalog request process.
Approval	ServiceNow Approval	Represents the required approval condition.
Workflow Action	Create Catalog Task	Creates the configuration task from the approved request.
Task Management	ServiceNow Catalog Task	Stores the generated task and assignment details.
Assignment	Hardware Assignment Group	Receives the laptop configuration task.
Execution Context	System User	Configured as the Flow run-as user.
Application Scope	Global	Configured application scope for the Flow.

2. Configuration Stack

Configuration Item	Value
Flow Name	Standard laptop task / Standard Laptop Task
Application	Global
Run As	System User
Trigger	Service Catalog
Action	Create Catalog Task
Request Item	Requested Item Record
Short Description	Laptop need to Configured
Description	Laptop need to Configured
Assignment Group	Hardware

Approval	Approved
----------	----------

3. Why This Stack Fits

- Uses native ServiceNow components already intended for service requests and fulfilment.
- Avoids unnecessary external applications for the core workflow.
- Provides traceability from request to Requested Item to Catalog Task.
- Supports future extension to notifications, inventory, SLA and dashboard capabilities.
