

PHASE 3 – PROJECT DESIGN

Solution Architecture

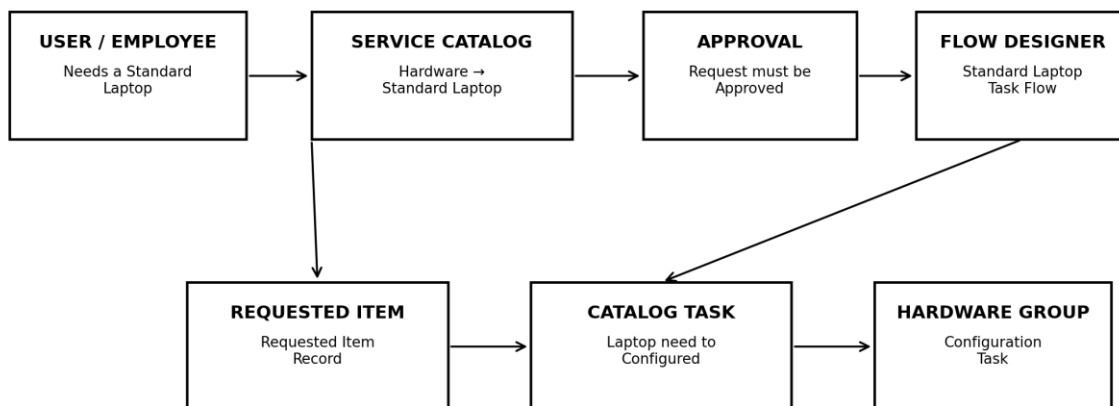

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Field	Details
Team ID	6ab4c536b5170a9b58b4c6e7
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

1. Architecture Overview

The architecture represents the major ServiceNow components and their relationship during the automated Standard Laptop procurement process.

Solution Architecture - Automated Standard Laptop Procurement

Core automation: Approved Service Catalog request → Flow Designer → Create Catalog Task → Hardware assignment

Figure 1: Solution Architecture

2. Architecture Components

Component	Role
User / Employee	Initiates the Standard Laptop request.
Service Catalog	Provides the Hardware category and Standard Laptop item.
Approval	Represents the required approval condition before

	task creation.
Flow Designer	Executes the Standard Laptop Task automation.
Requested Item Record	Carries request information into the flow action.
Create Catalog Task	Creates the configuration task.
Catalog Task	Stores the task and assignment details.
Hardware Group	Receives the task and performs laptop configuration.

3. Architecture Flow

Employee → Service Catalog → Approval → Flow Designer → Requested Item Record → Catalog Task → Hardware

4. Configuration Design

Item	Configured Value
Flow Name	Standard laptop task / Standard Laptop Task
Application	Global
Run As	System User
Trigger	Service Catalog
Action	Create Catalog Task
Request Item	Requested Item Record
Short Description	Laptop need to Configured
Description	Laptop need to Configured
Assignment Group	Hardware
Approval	Approved

5. Design Validation

The architecture is intentionally simple and uses the components specified in the source project. It provides a clear automated hand-off from an approved request to Hardware fulfilment.
