

PHASE 7

PROJECT DEMONSTRATION

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Team ID	6ab4c536b5170a9b58b4c6e7
Project Title	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Platform	ServiceNow
Demonstration Phase	Phase 7 – Project Demonstration
Main Tool	Flow Designer
Purpose	Demonstrate the complete Standard Laptop request-to-Catalog Task workflow

Document Purpose

This document provides the step-by-step demonstration procedure for the completed ServiceNow project and includes dedicated spaces for screenshots captured during the live demonstration.

Source Basis

The sequence follows the uploaded project document: Flow creation and trigger setup, flow assignment to Standard Laptop, Service Catalog ordering and approval, and verification of the generated Catalog Task. The source document is 10 pages long and contains these steps across pages 2–10.

7.1 Project Demonstration Overview

The project demonstrates how ServiceNow Flow Designer automates the Standard Laptop procurement process. A Service Catalog request triggers the flow. The flow creates a Catalog Task using the Requested Item Record, sets the short description and description to “Laptop need to Configured”, assigns the task to the Hardware group, and configures Approval as Approved. The generated task is then verified from the Requested Item.

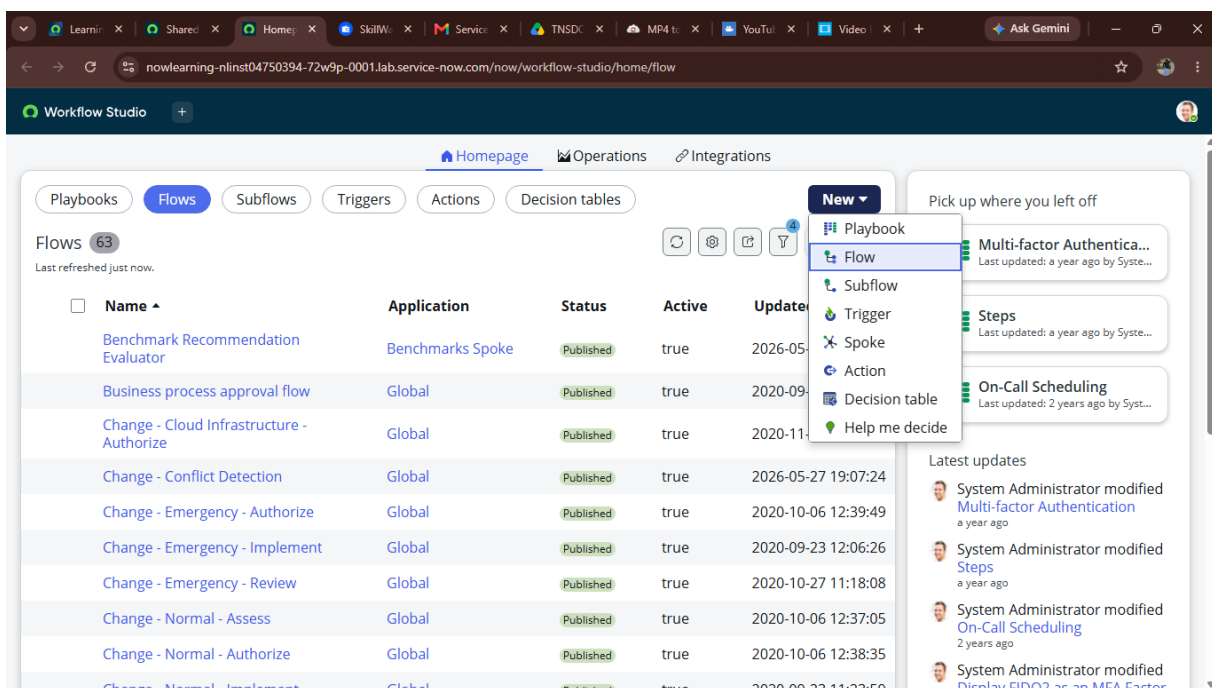

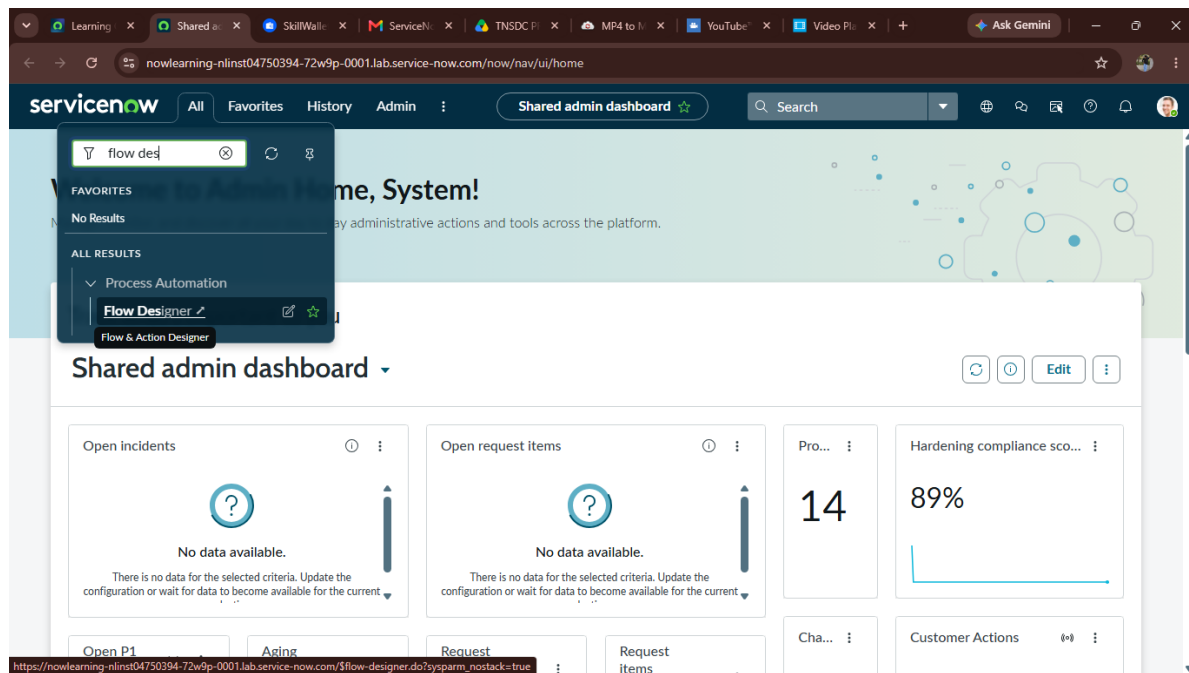

7.2 Demonstration Flow

- Open ServiceNow and Flow Designer.
- Create the Standard laptop task flow.
- Configure Global application and System User.
- Add the Service Catalog trigger.
- Add the Create Catalog Task action.
- Configure Requested Item Record, description, Hardware assignment group, and Approved value.
- Save and activate the flow.
- Assign the flow to the Standard Laptop service catalog item through Process Engine.
- Place a Standard Laptop request from Service Catalog → Hardware.
- Open the Request Number and review the Approvers section.
- Approve the request.
- Open the Requested Item and verify the Catalog Tasks section.
- Open the generated Catalog Task and verify its short description and assigned group.

7.3 Step-by-Step Project Demonstration

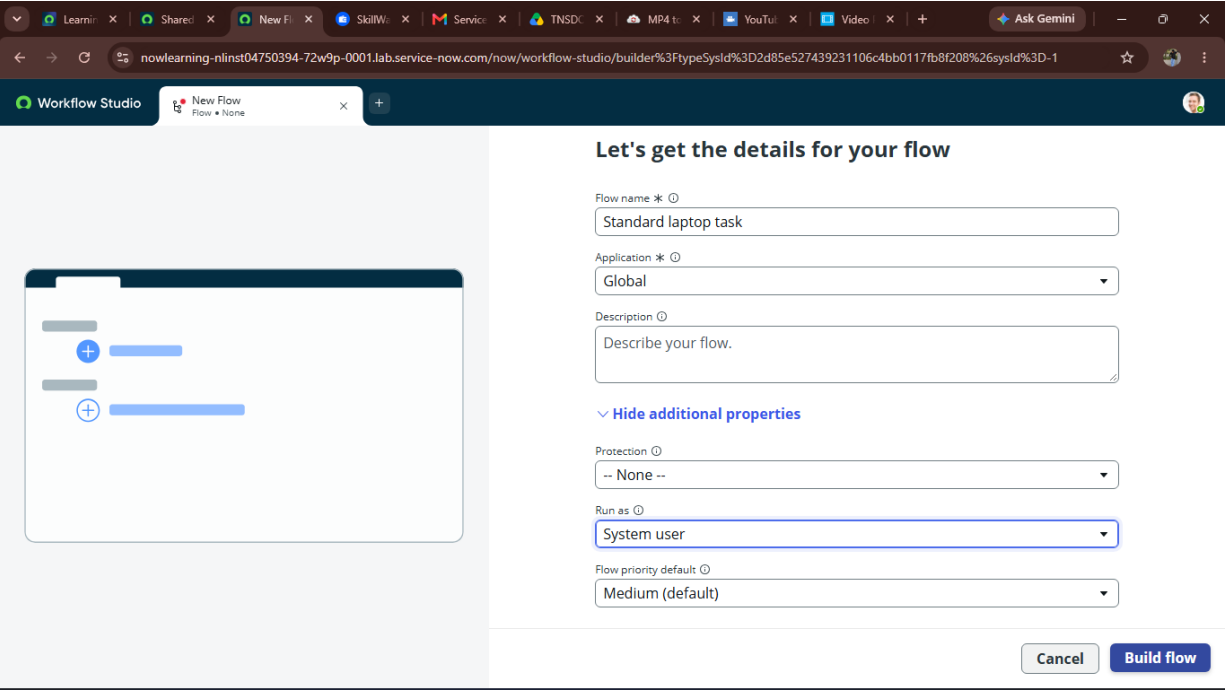

Step 1: Open ServiceNow and Flow Designer

- Open ServiceNow.
- Click All and search for Flow Designer.
- Select Flow Designer under Process Automation.
- Click New and select Flow.

Step 2: Create the Flow

- Enter Flow Name as “Standard laptop task”.
- Set Application to Global.
- Set Run As to System User.
- Click Submit.

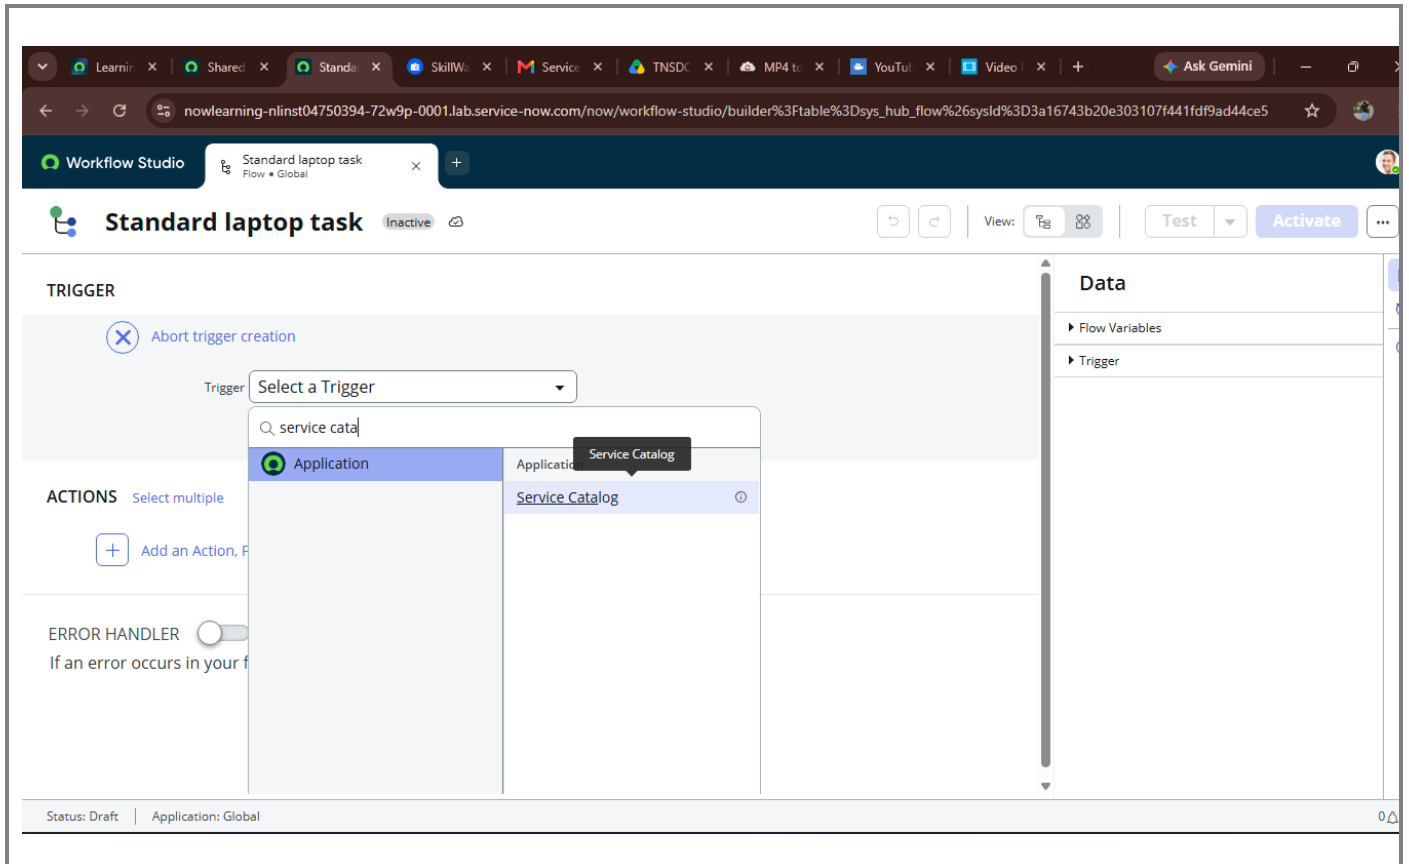

The screenshot shows the 'New Flow' configuration page in Workflow Studio. The browser address bar shows the URL: `nowlearning-nlinst04750394-72w9p-0001.lab.service-now.com/now/workflow-studio/builder%3FtypeSysId%3D2d85e527439231106c4bb0117fb8f208%26sysId%3D-1`. The page title is 'Workflow Studio' and the tab is 'New Flow'. The main heading is 'Let's get the details for your flow'. The form fields are as follows:

- Flow name *:
- Application *:
- Description:
- [Hide additional properties](#)
- Protection:
- Run as:
- Flow priority default:

At the bottom right, there are two buttons: 'Cancel' and 'Build flow'.

Step 3: Configure the Service Catalog Trigger

- Click Add a Trigger.
- Search for and select Service Catalog.
- Click Done.

Step 4: Add the Create Catalog Task Action

- Under Actions, click Add an Action.
- Search for Create Catalog Task and select it.
- Drag Requested Item Record into Request Item.
- Confirm the table is Catalog Task.

The screenshot displays the ServiceNow Workflow Studio interface for a 'Standard laptop task'. The top navigation bar includes tabs for 'Workflow Studio' and 'Standard laptop task'. The main workspace is divided into three sections: TRIGGER, ACTIONS, and DATA.

TRIGGER: A 'Service Catalog' trigger is selected.

ACTIONS: A 'Create Catalog Task' action is added to the workflow. The 'Action Properties' section shows the action name as 'Create Catalog Task'. The 'Action Inputs' section includes:

- Table Name:** 'Catalog Task [sc_task]'
- * Requested Item (Requested Item):** A field with a placeholder 'Drag and drop Requested Item pill'.
- Short Description:** A text input field.
- Fields:** A button '+ Add field value'.
- Wait:** A checkbox that is checked.
- Template Catalog Item (Catalog Item):** A dropdown menu with 'Select Template Catalog Item'.
- Catalog Variables:** A section with 'Available' and 'Selected' variables, each with a dropdown menu.

DATA: A 'Data' panel on the right shows the flow variables for the 'Trigger - Service Catalog' and the '1 - Create Catalog Task' action. The variables include 'Requested Item Record', 'Run Start Time UTC', 'Run Start Date/Time', and 'Table Name'.

The bottom status bar indicates 'Status: Draft' and 'Application: Global'.

Step 5: Configure Catalog Task Fields

- Set Short Description to “Laptop need to Configured”.
- Add Description with the same value.
- Set Assignment Group to Hardware.
- Set Approval to Approved.
- Leave remaining fields at default.
- Click Done.

Standard laptop task Inactive

Action Properties

Action: Create Catalog Task

Action Inputs

Table Name: Catalog Task [sc_task]

* Requested Item [Requested Item]: Trigger - ... - Requested Item ...

Short Description: Laptop need to Configured

Fields:

- Description: Laptop need to Configured
- Assignment group: Hardware
- Approval: Select a choice (Approved selected)

Wait: ☒

Template Catalog Item [Catalog Item]: Select Template Catalog Item

Catalog Variables:

- Available: Select Template Catalog Item field to load variables.
- Selected: Create Catalog Item(s) that point to this flow and the variables on that item(s)

Data Collapse All

- Flow Variables
- Trigger - Service Catalog
 - Requested Item Record: Record
 - Run Start Time UTC: Date/Time
 - Run Start Date/Time: Date/Time
 - Table Name: Table Name
- 1 - Create Catalog Task
 - Catalog Task: Record
 - Action Status: Object

Status: Modified | Application: Global

Step 6: Save and Activate the Flow

- Click Save.
- Click Activate.
- Confirm activation.

The screenshot displays the ServiceNow Workflow Studio interface for a flow named "Standard laptop task". The flow is currently in an "Inactive" state. The interface is divided into several sections:

- TRIGGER:** A "Service Catalog" trigger is configured.
- ACTIONS:** A "Create Catalog Task" action is added to the flow.
- ERROR HANDLER:** A section for handling errors, with a note: "If an error occurs in your flow, the actions you add here will run."
- Data Panel:** A panel on the right showing the data structure of the flow. It includes variables such as "Run Start Time UTC", "Run Start Date/Time", and "Table Name".
- Status Bar:** At the bottom, it shows "Status: Draft" and "Application: Global".

The "Activate" button is visible in the top right corner of the workflow editor.

Step 7: Assign the Flow to Standard Laptop

- Search for Maintain Items.
- Open Maintain Items.
- Search for Standard Laptop.
- Open Process Engine.
- Remove remaining automations if applicable and add Flow.
- Select “Standard Laptop Task”.
- Save the record.

The screenshot displays the ServiceNow interface for editing a Catalog Item named "Standard Laptop". The browser address bar shows the URL: `nowlearning-nlinst04750394-72w9p-0001.lab.service-now.com/now/nav/ui/classic/params/target/sc_cat_item.do%3Fsys_id%3D04b7e94b4f7b4200086eed18110c7fd%...`. The page title is "Catalog Item - Standard Laptop".

Item Details Section:

- Name:** Standard Laptop
- Application:** Global
- Active:** ☒
- Fulfillment automation level:** Unspecified
- Category:** Hardware
- State:** -- None --
- Checked out:** -- None --
- Owner:** (empty field)

Process Engine Section:

Select the appropriate process engine for the catalog item. Only one engine can be selected.

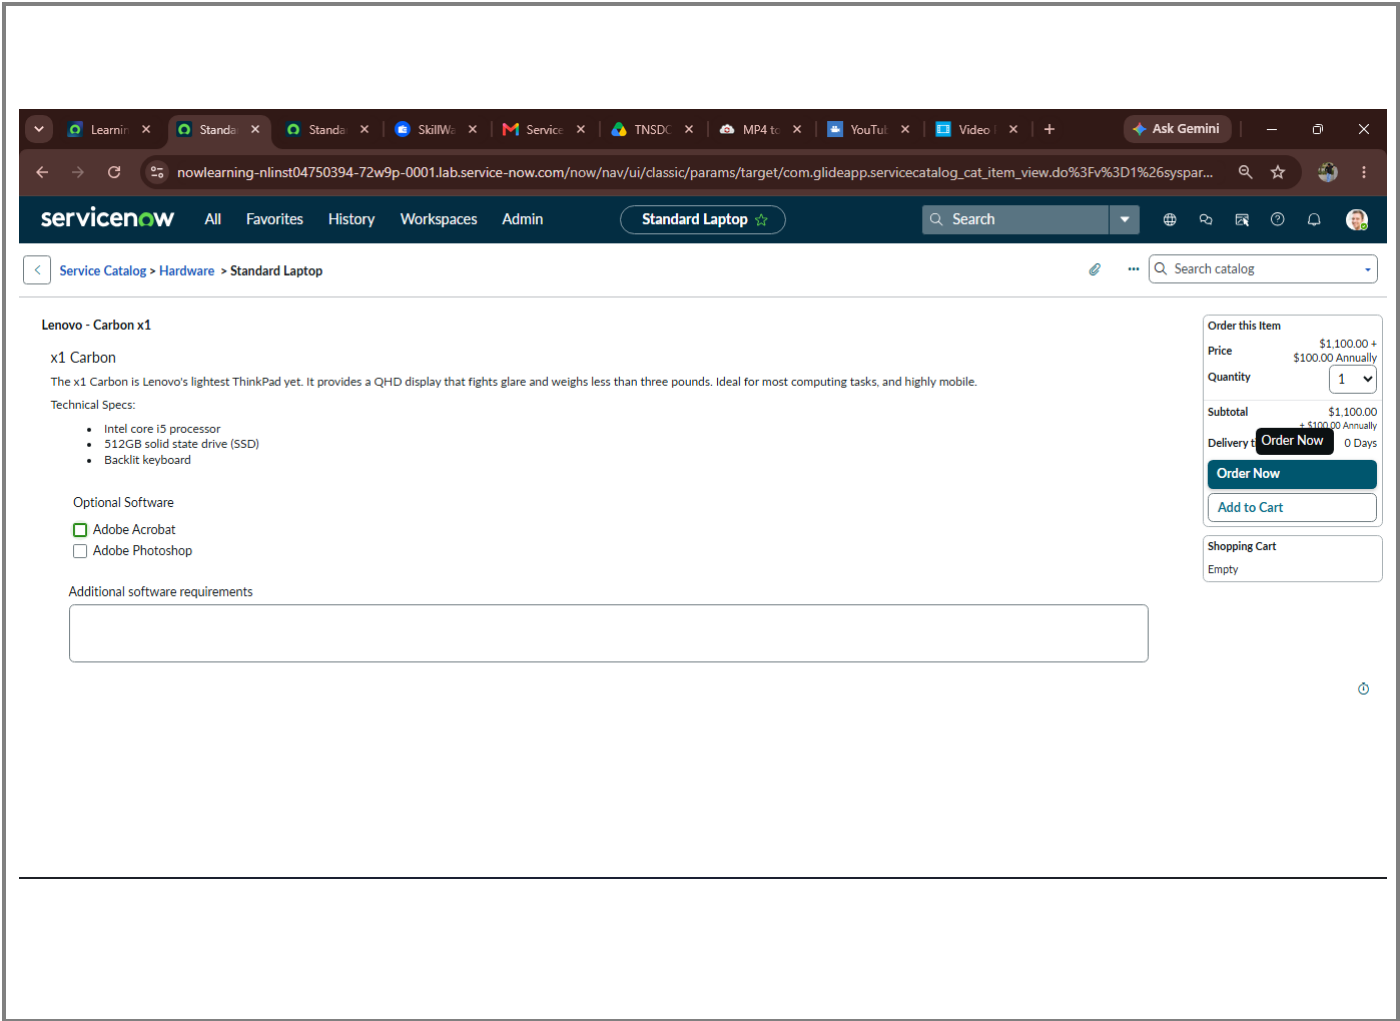

- Flow:** Standard laptop task
- Workflow:** (empty field)
- Execution Plan:** (empty field)

Buttons: Copy, Try It, Update, Edit in Catalog Builder, Delete.

Related Links:

Step 8: Open Service Catalog and Standard Laptop

- Search for Service Catalog.
- Select Hardware.
- Find Standard Laptop.
- Click Order Now.

Step 9: Open Order Status and Request Number

- Open Order Status.
- Click the Request Number.
- The Requested Number record opens.

- Locate the approval record.
- Use the approval action to approve the request.

Phase 7 – Project Demonstration | Streamlining IT Procurement

Step 11: Open the Requested Item

- Open the Requested Item section.
- Select and open the Requested Item record.

Step 12: Verify the Generated Catalog Task

- Scroll to Catalog Tasks.
- Open the generated Catalog Task.
- Verify Short Description.
- Verify Hardware assignment group.
- Verify the displayed task status and details.

The screenshot shows the ServiceNow interface for a Catalog Task. The browser address bar indicates the URL: `nowlearning-nlinst04750394-72w9p-0001.lab.service-now.com/now/nav/ui/classic/params/target/sc_task.do%3Fsys_id%3D8c0874bb20e303107f441fdf9ad44c99%26sys...`. The ServiceNow header shows the user is logged in as 'Ask Gemini'. The breadcrumb trail is 'Catalog Task - SCTASK0010001'. The form contains the following fields and values:

- Number:** SCTASK0010001
- Assigned to:** (empty)
- Configuration item:** (empty)
- Active:** ☒
- Approval:** Approved
- Priority:** 4 - Low
- State:** Open
- Request Item:** RITM0010001
- Requested for:** System Administrator
- Short description:** Laptop need to Configured
- Description:** Laptop need to Configured
- Work notes:** Work notes
- Activities:** 1
System
Field changes: 2026-10-02 08:33:56
Impact: 3 - Low
Opened by: [Empty]
Priority: 4 - Low
State: Open

At the bottom of the form, there are buttons for 'Update', 'Close Task', and 'Delete'. Below the form, there are tabs for 'Affected CIs', 'Approvers', and 'Group approvals'.

7.4 Final Demonstration Verification

Use this checklist after the live demonstration to record the actual observed result.

Check	Expected Result	Observed Result	Status
Flow created	Standard laptop task exists		
Trigger	Service Catalog trigger configured		
Action	Create Catalog Task configured		
Request item	Requested Item Record used		
Description	Laptop need to Configured		
Assignment	Hardware group selected		
Approval	Approved configured		
Flow assignment	Standard Laptop uses Standard Laptop Task		
Request	Standard Laptop request submitted		
Approval test	Request approved		
Catalog Task	Task generated under Requested Item		
Final verification	Description and Hardware assignment visible		

7.5 Demonstration Result

Record the actual result observed in the ServiceNow instance after completing the demonstration.

Actual Result: _____

7.6 Conclusion

The project demonstration shows the end-to-end automation of the Standard Laptop procurement workflow in ServiceNow. The flow connects the Service Catalog request to automatic creation of a Catalog Task, reducing manual task creation and assignment. The final verification checks the generated task details and Hardware group assignment.
